

COURT TECHNOLOGY PROJECT IDEAS

The following is a sample of projects that may be considered under the grant program. Please note this list is not all-inclusive.

Initiatives that support:

Transfer of Data, such as

- Connection to OCN
- Final dispositional data to the CCH database
- Upgrade to current server
- Upgrade to current case management system

Operational Efficiencies, such as:

- Video arraignment
- Digital imaging/paperless court
- E-filing support

Transparency, such as:

- Cameras in the courtroom
- Video of proceedings available to the public

Service to the Public, such as:

- Online docketing system
- Fillable PDF forms
- Court website design/redesign with an eye toward more interactive user-friendly site
- Court messaging system that sends automated messages to court clients
- Online payment system for court costs and fines

Access to Justice, such as:

- Video remote language interpretation

Customer Service, such as:

- Kiosks for:
 - o Check-in for delinquency and custody/visitation (using bar code scanners to ensure confidentiality)
 - o Self-serve check-in of parties, jurors, etc.
 - o Self-serve workstation for pro se litigants
 - o Self-serve reporting for community supervision
 - o Court entrance that allows a visitor to select a language and be given information about accessing the court building
- Wall-mounted flat-screen televisions to describe juvenile court proceedings (on a loop describing pleas, trials, disposition, and emergency orders)
- Purchase and maintenance costs for creating the civil protection wallet cards

Court Security, such as:

- Security check-point equipment (magnetometer, wands, computerized imaging systems)
- Enhanced security technology, such as surveillance cameras outside of court building
- Interior cameras for courtroom waiting areas
- Intercoms in court holding area
- Panic Buttons for enhanced security within the court
